Zilkha Radiology Offers In-Office Anesthesia

We have been performing **anesthesia** on certain patients for varied reasons including claustrophobia, painful conditions, patients who cannot hold still, patients with tremors, children, etc.

The studies are being **performed** in our East Islip office **by Board Certified Anesthesiologists** who are affiliated with major hospitals. Our office is certified by the "American Association for Accreditation of Ambulatory Surgery Facilities".

No referral is needed for the anesthesia part of the study. If a patient cannot undergo an MRI examination for any reason and requests anesthesia or the referring physician requests anesthesia, we will do the rest. **All our anesthesiologists participate in the same insurance as we do.**

With our **3.0 Tesla open bore MRI scanner in each of our offices**, the chance of being claustrophobic is reduced to a minimum. **We don't have any 1.5 Tesla MRI scanner** with its closed bore which can promote claustrophobia. **Our CT scanners have a wide opening** and the examinations are performed rather quickly, in a matter of seconds.

For those patients who need anesthesia for any reason, we can provide this service.
